AutoCAD is available for Microsoft Windows, macOS, and Linux operating systems. AutoCAD LT (a version of AutoCAD designed for home users) and AutoCAD Rasters (a version of AutoCAD designed for computer-aided drafting of mapping data) are available for macOS and Windows. AutoCAD mobile and web apps are available for iOS, Android, and web. Further reading AutoCAD is available for free from the Autodesk web site. AutoCAD is also available for licensing from third-party vendors. AutoCAD Technical Features AutoCAD is a powerful drafting and design tool for architectural, engineering, and mapping projects. AutoCAD offers users an integrated, interactive environment for designing, drafting, analyzing, and publishing. In addition to basic line drawings, AutoCAD includes: Architectural work. For residential and commercial projects, AutoCAD offers a variety of features that facilitate the design of major components. The software supports a broad range of options including mechanical engineering (structural and piping design), electrical engineering, plumbing (HVAC and water supply), and MEP (building energy and lighting systems). MEP (Municipal, Educational, Public). For the development of design and construction projects for government agencies and the public sector, AutoCAD features a range of tools specifically designed to aid the design and analysis of MEP systems. 3D, 2D, and wireframe drawing styles. AutoCAD is one of the first CAD software applications to offer the ability to create 3D and 2D drawings in several styles that allow users to display drawings in different ways. The software can be used to design any type of project, from simple 2D layout work to multidisciplinary design. Interactive ribbon controls. The drawing control panel displays editing tools on a ribbon that is similar to the one found on a word processor. Palmoplantar pustulosis (PPP) is a rare chronic skin disease, characterized by relapsing pustules on the palms and soles. We identified a novel missense mutation in PADI1 (c.1439C>A, p.T479K) in a Chinese patient with PPP. This mutation affected the catalytic site of the enzyme. When the patient's peripheral blood mononuclear cells were stimulated by TLR9 ligand, the production of interleukin-8 was increased in a dose-dependent manner. This study suggested that the mutation may be associated with the pathogenesis of PPP.Q: How to replace special characters from string with special characters in Ruby?
