Chatango Image Grabber is a small software tool which was created so that Chatango aficionados can easily grab profile pictures from other users, and save them to your computer, in several formats. The installation process runs smooth, as it does not offer to add third-party products, while the interface can be easily used by anybody, regardless of their previous experience with computers. It encompasses a menu bar and button, and a panel to display the detected image. All you are require to do is write the name of the user you want grab the photo from, and click the "Get Image" button. In order to save it to the hard drive, you have to right-

click the image and choose the "Save image" option. This software utility supports quite a large number of file types, including JPG, BMP, PNG, TIFF, WMF and GIF. It is important to keep in mind that all user names have to be written with lowercase letters. Otherwise Chatango Image Grabber will not display the picture that interests you. Help contents are not provided by the developers, yet a small "How to use" guide is incorporated. Nevertheless, if you take into consideration how simple to use this program is, it becomes apparent they are not actually a necessity. CPU and memory usage is insignificant and therefore, the computer's performance is not going to be affected by it. Moreover, you can easily run it alongside other programs. Taking all

of this into consideration, we reach the conclusion that Chatango Image Grabber is a pretty useful piece of software, especially for Chatango fans. It has a good response time and a user-friendly environment. Nero Winrar can be used to open the.rar files. It is free to try. There is a limit to the amount of time to try it, but it has a Trial version on their site that you can use it without the limit and gives you full access for 30 days. Before I tell you how to open a rar file, I want to tell you that they are very important for Windows users and if you do not want to lose the data in the file, then you should be careful that you always use an archiver to save the file. Rar files are only used for archiving, not for saving files. At the top of the program you have to search for an option

on the list. If you can not find it on the list,
