WD SmartWare Virtual CD Manager Torrent Download is an application developed by Western Digital to help you manage the use of the VDC (Virtual CD). The VCD feature is added to the My Passport and My Book hard drives and contain their installation software, password protection application, the encryption tool, user's manual and other resource that the drive needs to function properly. Each time you connect your external storage unit, the VCD appears in Windows Explorer like any other CD volume. This helps you when you need to install WD SmartWare, as well as encrypt or decrypt files using its security features. Otherwise, if you don't need to have the Virtual CD displayed, for example if you don't want unauthorized people to make changes to your drive or if there are just too many devices connected, you can disable the VCD. And by disable, you don't remove the feature, but hide it from sight. If at any time you wish to display the VCD, you can do so by running WD SmartWare Virtual CD Manager again. To help you hide or display the VCD, WD SmartWare Virtual CD Manager uses a simple, comprehensive wizard interface that guides you through the process. Before you get to remove the VCD, you need to update the drive firmware and there are some precautions that you need to be aware of. In case you have multiple devices connected and want to disable the VCD for some of them, the application allows you to do just that. Once you succeed in hiding the Virtual CD, you also disable the automatic file backup and retrieve features. You also no longer have access to the drives' security settings. WD SmartWare Virtual CD Manager is a reliable tool that helps you keep your drive settings and features safe and also tidies up the look of your operating system by hiding unnecessary items. Update Software – Update the firmware on the device. This will also update the drive's firmware. There are two versions of the Virtual CD, one for firmware 1.34 and another for firmware 1.33. This software is written in C#. The application has a built in flash update manager which will allow you to update the VCD as much as necessary

without restarting the computer or the drive. Disabling the Virtual CD will not remove its contents nor will it make the drive inaccessible. All the information is stored on the Virtual CD, hence keeping your data safe. My Passport – My Passport VCD Manager – The Virtual CD app for My Passport is the same as the Live version of the software, but it allows you to place multiple virtual cds in the My Passport and a media folder of your choice. The media folder can then be shared among family members. When you add a virtual CD, it appears as any other CD and you can open it using the default Windows Explorer. If you don't want to see the CD volume in your Explorer, you can hide it using the My Passport VCD Manager. You can also encrypt files using the VCD. Encrypter Utility – Encrypts files to the VCD. The most commonly used option is to use the files on the disc as a password to protect the contents of the disk. The program can encrypt any or all of the partitions on the disc. Media Manager – Contains a Media folder for managing cds. This allows you to organize a variety of files, such as photos, music, etc. You can share the media folder with other My Passport users in your family. You can also create backups of the files and the media folder, which makes sure that you don't lose them if something goes wrong with the drive. The backup copy is stored in the My Passport and is not accessible without the password. The images stored on the My Passport are encrypted. User's Manual – The My Passport user's manual will help you perform several actions while using the drive. It contains several setup scenarios that you can read out to guide you through the process. You can also create a command reference for quick access. This will contain all the shortcuts you have configured. You can access this guide from anywhere, including on the phone or tablet. You can also import your media from the device to the Media folder, create backups of the software and more. My Passport
