Collide is a first-person puzzle game where players must collect all of the coins on each map then slide to the finish. As an orange square, players must collect all of the coins on each map then slide to the finish, using as few moves as possible. Try playing on different maps as you unlock them to change up your strategy. Once you've beaten all of the campaign levels, try to earn or beat par. Also, as you play, you'll earn achievements. Try to earn all 100 and their corresponding rewards (they're not all for bragging rights). Earning achievements can unlock 10 different skins for the game. Players can also create and share their own maps. Using the in-

game Level Editor, players can create unique maps and share the levels with friends. As you create your own levels, try sharing them with other skilled players to see what "par" really is for each of your puzzles. Players can import their levels to "compete" with other players. Collide is the "free" desktop version of the game. There are also free and paid mobile versions of the game. The free version of the game is constantly being updated with new content. Like other paid mobile games, the Collide app uses a premium in-app currency. This can be purchased with real money or with points that can be earned by playing the game. Visit the Collide web site for the latest news, trailers, and more! About this Game: The deepest version of the iconic platformer ever, now fully remastered for the Nintendo Switch system! New challenges, dozens of new game worlds, and a 120 new challenges! For those who dare, grab the Super Guide and discover the secrets of Mega Man Zero! Mega Man Zero, the Iconic Mega Man series and Mega Man Zero 2 are creating a return to the glory days of NES gaming. It has been almost 25 years since the Mega Man Zero games were first released, which has left fans starved for a good game in the Mega Man series. The Mega Man Zero series delivers all the action packed platforming fun of the past, while switching it up with new ideas and gameplay mechanics. The Mega Man Zero series features a new graphics engine and contains a new storyline with new characters and worlds. Zero is not alone anymore. Instead of the Japanese, the Zero crew features Bob, Guts, and Rush from the Mega Man X series. These characters are joined by Zero's c9d1549cdd

Q: Using Hibernate's SessionFactory with InMemoryDatabase and HSQLDB I am trying to use Hibernate with InMemoryDatabase for the purpose of testing. When I attempt to run a Session, the database is opened in the embedded HSQLDB, rather than H2. I am using Hibernate 4.3.6 and HSQL 2.0.0, both using the internal database. I have tried to use SessionFactory, but I am getting an exception when using it with HSQLDB, as follows:

```
public class SessionFactoryTest { private SessionFactory sessionFactory; @Before public void setUp() throws Exception { Configuration configuration = new Configuration(); configuration.setProperty("hibernate.connection.driver_class", "org.hsqldb.jdbcDriver"); configuration.setProperty("hibernate.connection.url", "jdbc:hsqldb:mem:sessions"); configuration.setProperty("hibernate.connection.username", "sa"); configuration.setProperty("hibernate.connection.password", "sa"); sessionFactory = configuration.buildSessionFactory(); } @Test public void create_and_open_session() throws Exception { Session session = sessionFactory.openSession(); session.beginTransaction();

## **What's new:**

**Deep Sorrow is an album by saxophonist Lee Konitz's sextet of the same name recorded in 1970 and released on the German Blue Note label in 1971. It marks the first recording that drummer Joseph Bowie made with a sextet of which he was the co-leader. The music incorporates a broad range of styles including free jazz, soul and gospel music. The record has had considerable critical and public success and since its release has gained a significant cult following. In 2011 it was ranked number 416 in the French all time Top 500 music list of Les 500 Music les plus récents sur le plan musical on the French radio and television channel NRJ. The album was reissued as a two-CD set comprising Deep Sorrow, Volume 1: The Groove Patterns and Deep Sorrow, Volume 2: Earth, Water, Sorrow, Light, Heaven. The latter has four longer tracks reworked from the original master tapes. Reception AllMusic awarded the album 4½ stars and its review by Scott Yanow states, "The music is tighter and more structured than before and its message flows more smoothly. Bowie's drumming is often fiery and his tempos are usually brisk... the compositions, though often updated-sounding, play out as fascinating mood pieces to the styles of free jazz, soul and gospel". On All About Jazz, Thom Jurek wrote "What makes it groundbreaking are its original dimensions: Bowie's often surprising grooves, Konitz's freewheeling thematic ideas, and the (in an ensemble with three horns!) lyricism of pianist Bob Dorough, bassist Wilton Felder, and drummer Mike Clark". The Penguin Guide to Jazz says "This was the first album by a drummer who was the co-leader alongside an established saxophonist, and the first of six albums between that album and 1976's R-Evolution. Bowie was superb, and therefore is a point of contention for Konitz fans — but the rest of the music is quite extraordinary, not least by the standards of the rest of the JMT rhythm section". The music takes Lee Konitz and Bob Dorough with two colorful musical shapes. On the background of this unfreestyle compositional structure of a blueslike sonorization the solos of Konitz, Davis, Clark, and Dorough invest music to chance gestures and exaggerations, which makes a lively unrest. Track listing "I Have a Dream"**

## **System Requirements:**

To begin with, it is a fact that many games require a lot of system resources just to make it run. More often than not, the most popular games and desktop themes or skins offer no options for adjusting or tweaking. As such, you are sure to be doing the work of maintaining your system. Your system should be a minimum of a dual core processor of at least 2Ghz with at least 4GB of RAM and a minimum display with Widescreen support. On top of that, you'll probably want a large amount of hard drive space to handle some of
