Structure : - 3 types of playing card : the game of Abalone is the result of the play of a set of 3 playing card : the game of Abalone is the result of the play of a set of 3 squares : on the center of the 3 squares 2 numbers. On each playing card, we note the sum of these numbers: the sum of the three playing cards is equal to 18. The game of Abalone is all about the Push! Push the opponent player: - Each turn, there is a choice between one of three possible moves : each move gives you a sum-total of 3 in the central square. The sum-total of the 3 playing cards is always equal to 18 ; - Each move leads you towards the left, towards the right or to the center of the game board. You must push the opponent player: - If your sum-total is more than or equal to the sum of the other two marbles, pushing one of the opponent marbles out of the game, you have won! - When your sum-total is less than the sum of the two opponent marbles, you will be placed in a special difficulty situation, which is called a Sumito or Sumito position: to push out the opponent you can use one of the 3 moves, or one combination of two moves. For example, when we push you against a marble, the way you make a move depends on the way you will be pushed. - Push out the opponent, and you have won. You have to be careful not to have a Sumito positioning: some moves are not valid if the opponent is placed in a Sumito position : this means you cannot push the marble, but you can use the two moves left for the Sumito positioning. - With this scheme, you can create traps and strong positions. You have to push your opponent in the way you want to push them: for example, if you have 6 black and 3 white marbles left, you can choose to push 2 white marbles, creating a position where you will beat you with 7 marbles (because the sum of the first and second black marble is 7, while the sum of the 3 white marble is 4) - Or if you have an opposite proportion, you have to take this risk. Game of "Abalone" Strategy: At the heart of the game of Abalone is a simple principle: push your opponent marbles! Of course this is not the only rule. For example, if

I've had some good things happen to me and some not so good things happen to me. I am able to give a voice to how I felt during those times. And that is real to me. People put me in a certain box when I was growing up. There are very few people left who can actually answer the question I have already asked. But you know what? I'm OK with that.
