HoloAtm gaming team is proud to present its second game, which leads with an amazing soundtrack. This second game in our award winning series is all about relaxing and winding down, so to speak. It's a kind of quiet, slow rhythm game, in which you will enjoy your time without you being pulled into an active life. Making Blurbbs with LightTable - cpeterso ====== cpeterso Link to Light Table Screencast video: [------ jrnichols I would love to see a "daily" room for this sort of thing. ------ Walkman Good ideas are great and I like the fact that it is so visually appealing. But I don't think that the direction of how to enter texts is the best. It's even different from the way to enter a text into a cell. I think it should be more intuitive so that using it feels natural. ------ Walkman I like the idea but I would love to see dialog editor that is more intelligent. For instance it can understand commands such as: There are 4 people here [one, two, three, four] (brackets) So what would you like to do? (as a response to _two_) I'd like to go home (brackets) Okay (Enter) See you later (Enter) And so on. Q: Dynamically load CssClass of custom control I want to do something like this: Load Dynamic CSS Classes My Custom User Control Load ControlCSS.css ... ... If I use PathToCssFolder everything works fine. If I use something like... ControlStyleClass="ControlStyleClass;?>" /> then the css is not loaded properly Any ideas?

Herbalist is a young girl who, along with her mother, practices a type of magic. One day in the woods near their home, they meet an old man who asks them to help him find his cat, Neko. Neko is not only a cat, but also a mystery - its whereabouts are unknown to the world at large. Therefore, the old man has decided to seek the help of the world's greatest magician. Having asked the mother to buy a potion from a nearby alchemist, the Herbalist embarks on a journey to obtain the necessary ingredients, and she goes on this journey accompanied by the cat, Neko. Over the course of the journey she finds that there is much more to the cat, and that her old mentor did have some real magic about him after all. Herbalist is a game about magic, the real world, and discovery. It's a challenging game, but a very rewarding one as well. Play it and give feedback in order to help make this a better game in the future.Q: ASP.NET Web API Data Format I have a simple Web API application with an endpoint in which the endpoint accepts an array of a certain custom object. The custom object has two string properties that define the first and second names of the input file. Here is my endpoint signature: public IHttpActionResult Post([FromBody]List somedata) The problem is that the object is null after the request. Here is the request itself: POST /API/Http/Post HTTP/1.1 Accept: application/json Host: 10.0.0.92:8080 Content-Type: application/json Content-Length: 228 null I have the ReadAsJson() method in place for this object: public class SOMETHING { public string FirstName { get; set; } public string SecondName { get; set; } } I understand that null does not use the formatter for a parameter. Is there a way to configure the formatter to work for null? A: The reason you are getting null in your code is because the request is being sent by ajax. When you are sending by ajax the data is sent as a query string. This is the right way of doing things c9d1549cdd

The Owl path is more about getting in and out while the Bear path allows players to take down as many enemies as they can. Both paths will be added to the full game depending on how well players like the gameplay.Visually it is inspired by the Journey comic book series.Tons of minigames and sidequests make this game a big fun experience. Do you ever wish you could just back away from life? Have a multitude of choices that have no right or wrong answers? Is that the way real life works? This game is a parody of Dear Esther and Otherland. : PAULO ZANONIANO, CAMILA BÉGUIN, Marcello Serpa | A intendência de novos bancos de provisões contra governos corruptos, acompanhada de uma reforma na legislação de crimes financeiros, dificilmente completa-se sem incluir no processo de restituições à "caixa-preta" também o governo Temer. O ministro Arlindo Chinaglia, do TCU, sabe-o. Arlindo Chinaglia: "Não há como negar que as maiores contas paradas vão desagregar-se tanto com Dilma como com Temer" A minha atuação foi reconhecida no Conselho da Contabilidade Pública e dela fui convidado a ficar indicado pelo TCU. O motivo: muita coisa aconteceu durante aquela casa sob a gestão do ex-ministro José Múcio Monteiro e as contas que faziam parte do sistema antigo não eram sequer arquivadas e restavam sendo vazadas ao mundo através de pessoal com fala ("papo rolo") da figura da saída do governo Delfim Netto. Apresentei propostas e fui chefe da operação para dentro do último governo Dilma Rousseff. Quando ela saiu houve uma conjuntura perfeita para Bolsonaro – principalmente depois do episódio do Jornal Nacional de novembro de 2017. Infelizmente tem-se chegado uma conjuntura perfeita para Temer. Sobre isso, há todo tipo de instrumentos para identificar e aplicar as contas. Nada disso acontece. A Casa Civil tem apostado uma punhada de pessoas que nem sabe na sua área de atuação. A Casa Civil tem apostado tudo na
