n the world, office suites are usual things. Among the three office suites, the MS Office is the most popular one, and there are so many Microsoft apps in the market that can fulfill the needs of all users. In case your're an MS office user, you are probably searching for a new office tool or an alternative. Well, you can go for one of the many alternative programs, like LibreOffice, PiTiVi, or others. We have decided to pull together the top reasons as to why every MS Office user should try OfficeNeo. You may also know OfficeNeo as Cozi. It's a new office suite for iPhone or Android that supports everything that the MS Office does for Windows users. It's been a while since a new office suite has come out that can impress many users. Not only is the new suite intuitive and easy to use, but it can also be improved upon in the future. With OfficeNeo, users may do things that they are used to with Office. Certain of the features that OfficeNeo might not have are still being developed and surely will be added in the future. There are several reasons why everyone should try out OfficeNeo. We have compiled these just for you! Creating New Document When you open OfficeNeo, it may feel like a Mac-based or other GUI-based MS Office suite. However, if you open a new document, you will notice that the interface is very similar to the iPhone version. Another similarity is the fact that, if you go to File in the Menu bar, you will see the option for creating a new document. This is similar to how one creates a new file in Mac or other office suites. If you have copied documents in MS Office before, you will feel at home in OfficeNeo as well. You can paste a document using the menu bar or toolbar. You can use Word or Excel files as templates and reuse them in your new document. Also, you can change or edit the template files if you want. Just like other office suites, you can also import text files. In addition to that, you can convert PDF, DOC, DOCX, RTF, and other files, which you can then use them in the document. If you would like to rename your document, you can do so. Just like other office suites, you may also create a b7e8fdf5c8
