Some of these are Visual LISP, AutoLISP, VBA, and ObjectARX, with VBA and ObjectARX being used for application extensions. AutoCAD can read and write most spreadsheet and text file formats. These include Excel 2003, Microsoft Office Open XML Spreadsheet, Microsoft Office Open XML Presentation, OpenOffice XML Spreadsheet, OpenOffice XML Presentation, Plain text, CSV, Text, and the Unicode character set. In addition, AutoCAD reads and writes files in Portable Document Format. The native file format of AutoCAD is DXF. This file format is a DGN derivative that was introduced in version 1990. It supports non-hierarchical 2D, 3D modeling and assembly. DXF also supports 2D object references (to other DXF drawings). Other formats that are supported include DWG, RTF, PDF,

PostScript, SVG, JPG, GIF, BMP, and PNG. In 2010, Autodesk released AutoCAD WS, a web services API for rendering and rendering features. Currently, a large number of AutoCAD plugins are available on the Application Store as Autodesk Exchange Apps. AutoCAD supports third party development through the AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD Landscape, and AutoCAD Mechanical extensions. Customization Autodesk Exchange Apps is a dedicated app store for third-party plug-ins created by Autodesk and other third parties. The Exchange app store is integrated in AutoCAD and allows third parties to create plug-ins that extend the functionality of AutoCAD. The Exchange app store also allows users to download free plug-ins from the Autodesk Exchange website. Extensions A large number of third-party AutoCAD extensions (add-on applications) are available on the Autodesk Exchange Apps. These include custom software development projects and information resources created by Autodesk and other third parties. The Exchange app store offers three ways of distributing AutoCAD extensions: As standalone.xap or.cer files As plug-ins that are embedded in AutoCAD As AutoCAD views (for usage in the current drawing) af5dca3d97
