Pad (free) and use your phone. If you have any ideas, please use the 'share' button on the bottom of this page (required). I often use different ways

to store my floss in my work. Lately, I like to use

Kinder Surprise boxes. To begin with we wash them well, dry them and with a glue gun and various embellishments decorate them. Then we need to cut off the bottom, sides and top of the box and leave only the bottom. Like this Then we need to trim the bottom, sides and top of the box

and leave only the bottom. Like this: Using a toothpick and ruler, we measure the height distance and mark the bottom of the box. I use a normal cigarette box. But you can take any box that fits the size. In my case the size of 14 * 17 * 3 cm. Next, you need to cut the cardboard into strips and glue them into a ring. Then glue the top of the box, glue the bottom: Next you need to make the walls. For this we glue the cardboard strips. I have a sheet width of about 14 mm and a length of 9 cm. I did it in order to make an envelope out of paper later. Now make the roof. We take a strip of cardboard which is equal to the length of our roof. The width of the strip is about 1 cm. Put some PVA glue on the strip and wrap it with strips of paper, trying to keep them evenly spaced. Glue a strip of cardboard on top. From cardboard with scissors, shape a cone and glue it to the top of the roof, which we already have. Glue parts. We start with the roof. Take cardboard from the box. Gluing cardboard to the cardboard box. Cut the cardboard around the edges. We should have two semicircles with cut out parts for the roof. Glue the semi-circles to each other. Also glue the side parts. Glue the walls. Glue a half-circle of cardboard to the box. We have one wall. Glue the second wall. Glue the ceiling. Gluing the

roof. The roof should fit tightly to the box. Gluing the walls. The roof should fit to the box and to the walls on both sides. dd2bc28256
