
Xlive.dll Virtua Tennis 4

It gives me an error message "xlive.dll" is missing and then I found on the Internet that I needed to install the Windows Redistributables, after which I installed them, but now . xlive.dll is missing and nothing happened. I read online that this "xlive" file is part of Microsoft Game Studios, but not in my case. How can I fix this? It was my first time to upload an .xlive file and I don't know how to fix it. I downloaded it from the official site I can't tell you what to do without seeing the details of the error (or even which version of xlive.dll was not found). However, depending on what your problem tells you about you (what is the error?)
