Atomic Lead Extractor 2022 Crack lets you gather leads from various online sources, as well as filter and verify them, and send your results by email or export them with the help of a dedicated feature. What are the app's main fields? When opening Atomic Lead Extractor Free Download for the first time, you will be prompted with a simplistic menu and interface. Although the program's GUI is a bit outdated and old-fashioned, you can most certainly navigate with ease the main. Users can switch between three different tabs 'Project,' 'Filter,' 'Help.' The first section allows you to conduct lead searches or data mining operations, as well as control the current processes and access the export features. In the second field, the 'Filter' tab, you can access the contact lists, sort and filter your data by keyword, and delete the duplicate contacts. Last but not least, in the 'Help' tab, you can update your software and manage your account. How do you perform lead searches? The app's lead search engine can be used in two different ways; you can insert a website's URL or use a specific keyword. The last option targets super-specific topics (e.g., GitHub). Furthermore, your result lists, depending on the type of search you choose to conduct, will yield different pieces of information (URLs, contacts, new search links,

etc.). The tool allows you to create user-specific projects for which you can customize the search engines where you conduct lead searches or data mining, the types of online documents you want to scan, the number of simultaneously running processes, proxy server usage with configurable hosts, etc. Final considerations To summarize, Atomic Lead Extractor does help you granularly configure your search methods and filter your extracted data. Moreover, with the help of the 'Export wizard' feature (available for the paid version only), you can choose how you want to export the data you've gathered and what file type you need the information formatted to.
