It's a feature to reveal effects that Photoshop produces in images as a result of your retouching (e.g., Auto Black & White, Auto Contrast, Auto Brightness, Auto Saturation, or Auto Tone). You can find these settings on the Retouch menu in the Image Display Options dialog box. There is a little slider bar or button at the bottom of the Retouch menu that allows you to preview how your image will look when the mimicking effect is applied. You can use one or more of the mimicking effects and see how it looks in your image. Then you can control the strength or the amount of it by dragging it across the slider or selecting any from the pop-up list. You can use the Auto Save feature of the Photoshop to keep the duplicates of your images. If you cancel the operation or regularly open the image again you will overwrite the existing image. These duplicates are on the desktop, so if you save your image on a cloud server, you can easily get them as well. This feature is also known as Keep. The buttons are defined in the Appearance Options dialog box. If you create a button by dragging, you can add the button to the tool palette. Buttons can be resized, moved, or added to the button dial. Click on the button to trigger the action of the button on an image; for example, the S-bend tool. You can use the Color Mixer, which is one of the most popular features of Adobe

Photoshop. You can use this feature to create various color combinations to match the color of a difficult image or apply a particular color scheme to images. When you have selected colors, they are combined using a configuration tool with four color dials to adjust the hue, value, and saturation of an image. This feature is also used when creating a color profile.
